Shade card

Endless possibilities bloom as colors
effortlessly communicate

“ Revolutionizing fashion trends through a circular mission, regenerating textiles for a sustainable tomorrow ”

Established in Pollachi, Tirumalai Textiles is one of the leading manufacturers of recycled and regenerated yarns using pre-consumer textile waste generated from garment mills.

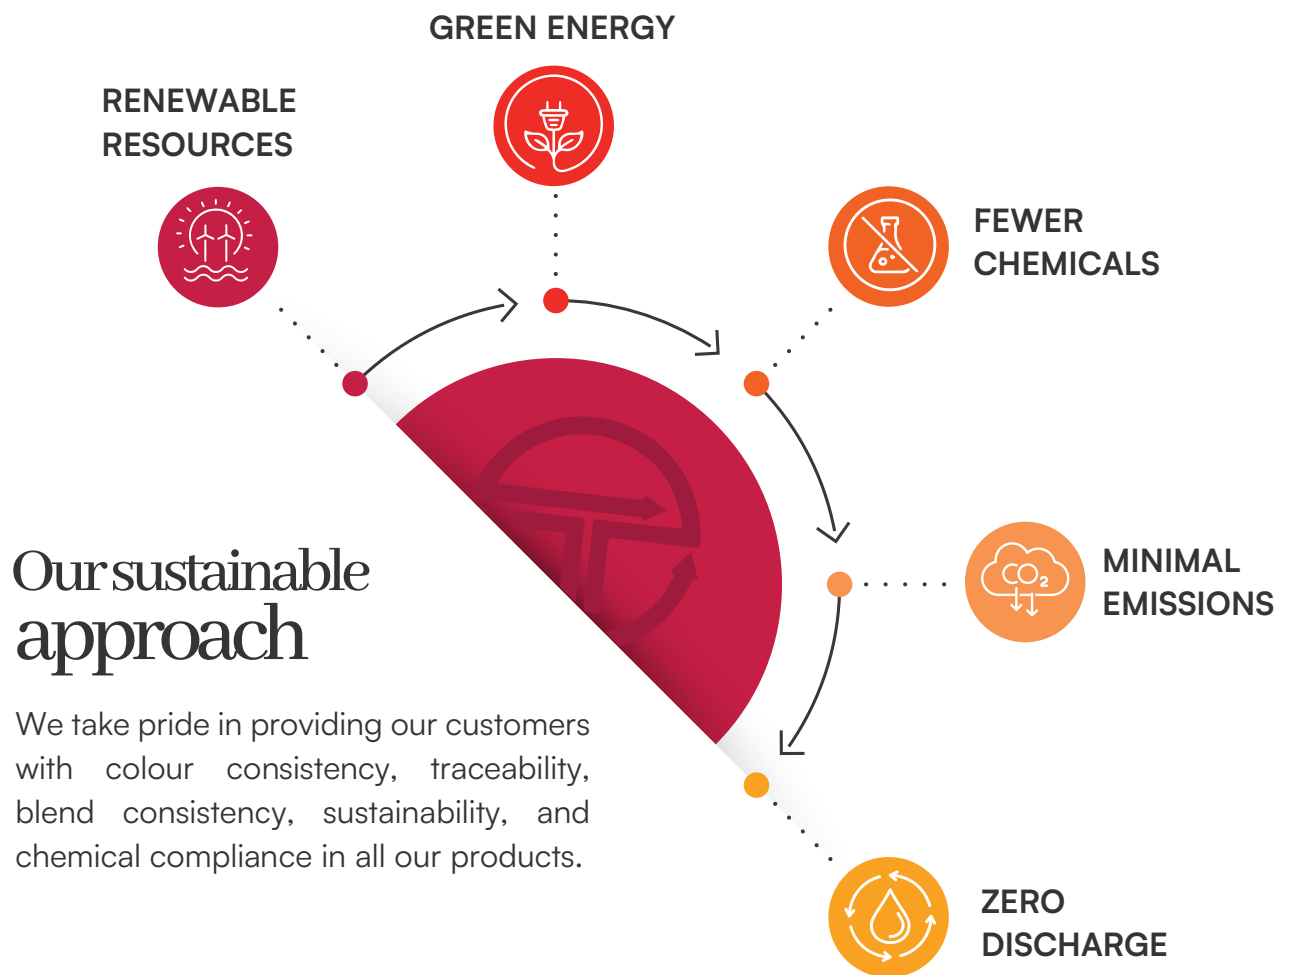

Our open-end recycled yarn is tailored as per customer specifications and is suitable for weaving and knitting casual wear, denim and home textiles, among others.

As a responsible textile solutions provider, we strive to conserve the environment and foster environmental sustainability, embracing eco-friendly practices.

Our dedication towards producing sustainable fashion has earned us the prestigious GRS certification, which reflects positively on our efforts towards promoting recyclability.

We produce 500 tons of usable fibres and 600 tons of recycled yarn month-on-month. Our holistic approach embraces green alternatives with zero discharge, closed-loop and renewable resources.
